

# Fuel Management Reporting

FUELMAN is there to help. Your customer service representative is always just a phone call away!

Drivers are required to enter odometer readings at each purchase. With this information, you can gauge vehicle and driver efficiency from miles per gallon data, or spot variances, which may indicate poor driving technique, needed maintenance, or that your company did not get the use of the fuel.

Fuel transactions and maintenance transactions are listed separately by vehicle.

Transaction information is sorted by vehicle - using the description and vehicle number provided by you.

Date and time of each transaction is provided.

Each driver is assigned a personal identification number. This field allows you to identify who purchased fuel.

Fuel type purchased is provided for each transaction. You may restrict fuel types allowed by vehicle.

Fueling location information is provided with each fueling transaction. You may also restrict the locations where a card can be used to prevent unauthorized purchases outside a driver's territory.
